

“WHY BUY LEFT HAND DRIVE?”

Volkswagen Camper Van Specialist,
Sam Clugston, tells us why you should
buy a Left Hand Drive bus...

- 1 Our LHD buses almost always come from dry US states having enjoyed an easy life in the sunshine. This means that you have a rust free shell that forms the perfect basis for a light restoration without the need for excessive welding / metal repair work.
- 2 LHD buses are more affordable being on average 20% cheaper than RHD buses.
- 3 LHD buses have always been very desirable in the UK and are increasing in value at the same rate as RHD buses.
- 4 LHD buses are ideal for those European road trips you have always dreamed of.
- 5 LHD buses are totally different from your average LHD car. Remember that the visibility on these buses is superb as there are windows everywhere you look, so the blind spot that you are worried about virtually does not exist!
- 6 LHD buses are very easy and relaxing to drive on UK roads. If you would like reassurance of this then come for a test drive and I will gladly show you.
